FRAME

The frame is built using 100% solid European beech, a strong, bendable, and renewable hardwood. This light-colored wood is ideal for staining in any color.

FRAME CONSTRUCTION

The chair is assembled with hardwood dowels that are connected by metal-to-metal hardware, coated in Loctite.

FRAME FINISH

The stain is hand-wiped into the grain to ensure even color and maximum penetration into the wood. The frame is then sanded and sprayed with two coats of catalyzed finish to prevent cracking and chipping.

BACK

The curved, upholstered back provides comfort and modest simplicity.

SEAT

All seats are custom-built and upholstered at our factory to meet our exacting quality standards.

GLIDES

Options include nylon glides, small metal glides, standard metal glides, felt glides, and metal glides with a nylon cap.

OPTIONAL BIBLE BOX

Specifically created for our religious market, the bible box offers beautifully designed built-in storage. The storage box is constructed from sturdy hardwood, attached to the back of the chair, and hand finished to match the chair. Contact your dealer for more information.

OPTIONAL IN-LINE WHEELS

In-line wheels are available in white or brown. The housing for the wheels is cut directly into the front legs of the chair. Professionally secured in our factory, the in-line option is more subtle than casters, while still allowing for easy movement. Available for armchairs only.

C.O.M. UPHOLSTERY

The amount of fabric needed per chair is estimated using 54-inch (137 cm) wide material. The actual amount required may vary depending on special pattern matching and the width of material. Specific yardages for orders can be provided upon request along with the model, quantity, and fabric details. There is a \$50 flat charge for COM to cover Duty and Customs charges.

INTERLOCKING GANGING

This feature is meant to interlock our chairs to create a smooth, continuous look. This allows you to secure multiple chairs together in rows for a straight line every time.
