SOLID WOOD SEATING  
DENVER

The body hugging curved back on the **Denver** chairs and barstools make this a popular and comfortable choice. Both wood and upholstered seats are available for this model. Although the natural finish displays the solid beech hardwood perfectly, any of our standard stains, along with complimentary upholstery can make this a distinct and creative piece.

### PRODUCT FEATURES

- 1 Strong, beautiful European Beech hardwood frame
- 2 Sculpted wood seats provide comfort
- 3 Body hugging curved back design offers support
- 4 Standard and custom stain options are available
- 5 Plush 2.5-lbs foam seat
- 6 Solid mortise and tenon joints
- 7 Generous gap between the back and seat offers easy cleaning

### STANDARD WOOD STAIN OPTIONS

Stain colors match our MityLite® tables, available at [mitylite.com](http://mitylite.com). (Custom stain matching is available, but a surcharge may apply.)

\*Matches MityLite buffet & dining table tops

### FABRIC OPTIONS

See [holsag.com/fabrics](http://holsag.com/fabrics) for selections.

### SPECIFICATIONS

BACK STYLE	ARM OPTION	FINISH	FABRICS	FABRIC YARDAGE	STANDARD GLIDE
Fixed	n/a	European Beech Hardwood	Grades 1-4+ TB133, COM	Visit <a href="http://holsag.com/fabric-requirements">holsag.com/fabric-requirements</a>	Nylon

### FRAME

The frame is built using 100% solid European beech, a strong, bendable, and renewable hardwood. This light-colored wood is ideal for staining which provides an attractive finish in any color.

### FRAME CONSTRUCTION

Mortise and tenon joints are glued with high solids water-based glue and reinforced with 18-gauge nails. Screws and corner blocks provide stability and strengthen the main joints.

### BACK

The curved back hugs the body to provide comfort and a versatile look.

### FRAME FINISH

The stain is hand-wiped into the grain to ensure even color and maximum penetration into the wood. The frame is then sanded and sprayed with two coats of catalyzed finish to prevent cracking and chipping.

### SEAT

Available in upholstered or solid wood seats sculpted at the factory to ensure a comfort. The standard barstool seat height is 30 inches, and chair seat heights ranging from 24 inches (61 cm) to 30 inches (76 cm).

### GLIDES

Options include nylon glides, small metal glides, standard metal glides, and metal glides with a nylon cap.

### BARSTOOL KICKPLATE

Barstool kick plates provide style, protection, and durability. Brass kick plates come standard, but chrome and black kick plates are available upon request for no additional cost.

### IN-LINE WHEELS

In-line wheels are available in white or brown. The housing for the wheels is cut directly into the front legs of the chair. Professionally secured in our factory, the in-line option is more subtle than casters, while still allowing for easy movement. Available for armchairs only.

### C.O.M. UPHOLSTERY

The amount of fabric needed per chair is estimated using 54-inch (137 cm) wide material. The actual amount required may vary depending on special pattern matching and the width of material. Specific yardages for orders can be provided upon request along with the model, quantity, and fabric details. There is a \$50 flat charge for COM to cover Duty and Customs charges.

### CASTER

Casters can be added to arm chairs to provide a full 360-degree rotation. The 2-inch sphere wheel and antique brass are designed to not only be beautiful but to act as a guard. We recommend casters only be fixed to the front legs to provide stability for your clients. The casters are professionally installed to ensure there is zero compromise to the integrity of our chairs.

### CUSTOM ETCHING

Add elegance to the chairs with an etching of your company or establishment name/logo. Or, add numbering/sequencing. Contact your dealer to arrange and create a custom design to suit any occasion.
