SOLID WOOD SEATING

ALTA

The unique design of the **Alta Family** provides both function and aesthetic appeal. The upholstered seat features a plush foam cushion. The solid wood frame includes a cutout at the top of the chair back that makes moving the chair easier. The family includes an arm chair, side chair, and barstool that are a great fit for senior living environments. There is also an option to add a fully upholstered Accent seat to any product in the family.

PRODUCT FEATURES

- 1 Built with 100% European Beech Hardwood
- 2 Provides exquisite comfort with a plush 2.5-lbs foam on the seat & 1.8-lbs foam on the back
- 3 Solid mortise & tenon joints provide stability
- 4 Offers a wide range of standard stain colors
- 5 Features a unique nine-step frame finishing process for a durable stain color that lasts
- 6 Antimicrobial, catalyzed lacquer protects the frame from absorbing germs, & bacteria
- 7 Generous gap between the back & seat offers easy cleaning
- 8 Optional fully upholstered Accent seat

STANDARD WOOD STAIN OPTIONS

Stain colors match our MityLite® tables, available at mitylite.com. (Custom stain matching is available, but a surcharge may apply.)

FABRIC OPTIONS

Due to the sewing and style of the chair, upholstery options are restricted to solids and non-matched patterns. Striped fabrics and fabrics that need specific alignment are not recommended. The actual amount of fabric required may vary depending on special pattern matching and the width of the material. See holsag.com/fabrics for selections.

FRAME

The frame is built using 100% solid European beech, a strong, bendable, and renewable hardwood. This light-colored wood is ideal for staining which provides an attractive finish in any color.

FRAME FINISH

The stain is hand-wiped into the grain to ensure even color and maximum penetration into the wood. The frame is then sanded and sprayed with two coats of a catalyzed finish to prevent cracking and chipping. The finish includes an antimicrobial formula.

FRAME CONSTRUCTION

Mortise and tenon joints are glued with high solids water-based glue to strengthen.

BACK

The form-fitting, curved back is constructed with wood and a cutout at the top for easy movement.

SEAT

The plush foam seat is 2.5 lbs to provide added comfort.

GLIDES

Options include nylon glides, small metal glides, standard metal glides, felt glides, and metal glides with a nylon cap.

BARSTOOL KICKPLATE

Barstool kick plates provide style, protection, and durability. Brass kick plates come standard, but chrome and black kick plates are available upon request for no additional cost.

BARSTOOL ARMS

The barstool is also available with optional arms.

ACCENT SEAT

An optional fully upholstered Accent seat is available on the arm chair, side chair, and barstool.

OPTIONAL IN-LINE WHEELS

In-line wheels are available in white or brown. The housing for the wheels is cut directly into the front legs of the chair. Professionally secured in our factory, the in-line option is more subtle than casters, while still allowing for easy movement. Available for side chairs and armchairs only.

C.O.M. UPHOLSTERY

The amount of fabric needed per chair is estimated using 54-inch (137 cm) wide material. The actual amount required may vary depending on special pattern matching and the width of material. Specific yardages for orders can be provided upon request along with the model, quantity, and fabric details. There is a \$50 flat charge for COM to cover Duty and Customs charges.

HOODED BALL CASTERS

Castors can be added to arm chairs to provide a full 360-degree rotation. The 2-inch sphere wheel and antique brass are designed to not only be beautiful but to act as a guard. We recommend casters only be fixed to the front legs to provide stability for your clients. The casters are professionally installed to ensure there is zero compromise to the integrity of our chairs. Available for side chairs and armchairs only.
